

**A cottage garden is the dream of every child. Even yours.  
Do you want it to come true?**

**A safe and comfortable playhouse for your children to play, develop their personality and learn to share.**

## Top safety

We are specialists in EN71 toy standard-certified children's houses. The safest on the market, these playhouses have unique solutions for your child's protection.

## Quality Assurance

They are made from the finest materials, tightly sealed and with many innovative details. We are aware of the environment, and we therefore use wood and the most environment-friendly and recyclable materials, and also ensure that our playhouses are 100% reusable.

## Nothing but fun

By themselves or with friends, children have a great time in their house because it offers endless possibilities. For inviting parents to lunch, organising yourself, reading, making an art studio ... Even spending the night there!

## Nordic pedagogy

Children's garden playhouses are a great way to encourage the so important independent childhood play. This culture of autonomous learning started in the Nordic culture, where it is very common to find playhouses for children in the gardens, because they stimulate the children's physical, emotional and social development, and their independence.

# ILLINOIS MAXI

House inspired by the Modern Movement of the 20th century. Clear shapes and perfection in details.

To enjoy the scenery and the feeling of freedom.

## FEATURES:

Very spacious, bright and made up of two pieces separated by a wooden wall made of walnut and a dividing curtain.  
Spectacular house which is supported by the exterior structure, leaving its ends to overhang

## TECHNICAL SPECIFICATIONS:

### Materials:

The main material of this playhouse is Birch plywood. It is a material that is highly resistant since it made of a dense wood and glued with phenolic resins ideal for wet environments. The board comes at the edges with a sealing to water (Sikkens Kodrin) and two layers of water-based painting (Sikkens Rubbol for exteriors and Sikkens Cetol for interior, on semi-transparent white)  
Bevelled corners for maximum security.

**Roof:** The roof has thermal insulation, which minimizes high inside temperatures in the summer months.

The waterproofing is made with precast EPDM material (rubber) and has a gargyle gutter spout.

### Door and windows:

The playhouse has a total of 8 aluminum openings, five stationary windows, two sliding windows and the door, which opens outwards.

Security glass 3+3mm.

In addition, there are two operable windows on the back wall, made of metacrylate.

**Curtains:** The playhouse comes with a rail guide system and curtains. Includes 3 high-quality curtains and the complete rail system.

**Structure and foundations:** The Illinois MAXI playhouse, unlike other models, is supported only by 4 height-adjustable steel basements, supporting a substructure under the floor, making it more difficult to assemble than other models.

The outdoor terrace itself is supported by normal plastic adjustable feet, like other children's houses.

### Total weight:

- 800Kg. (1764 lb)

### Recommended age:

- From 3 to 10 years old.

## INCLUDES:

## OPTIONAL EXTRAS:

- Lighting. The playhouses can be equipped with various interior lighting systems with low voltage lighting and high intensity LED bulbs.

Three 3W lights are built into the back area of the house and light strips of 30led/metre are aligned with the carpentry.

The switch is next to the door. Electrical box under flooring, can be registered from the inside.

- Soft natural carpet flooring, A very high-end carpet from the InterfaceFLOOR, and designed for public concurrence. Provided with 50x50cm tufted plain level loop tiles, are very easy to install and clean.

Grey colour with some white and black, model Heuga 727, ref.7901

- Lock set. For safety, the door can only be closed from the outside.

- Artificial Grass over roof. To improve the finish of the exterior roof, it's possible to cover the roof with artificial grass, or white marble gravel.

## A dream come true.

By setting up SmartPlayhouse, David Lamolla Kristiansen, director and founder, has turned his hobby into his professional work.

**“When my first daughter was born, I knew I had to spend my time creating a proper place for her, where she could develop without the direct intervention of their parents.”**

The playhouses for children are not a new product, especially in northern Europe where it is very common to see these buildings in the gardens. “I had a traditional style cottage in the garden of my family in Denmark”

The aim of SmartPlayhouse is to be the leader in home garden for children.

Using the latest technology in manufacturing, highest quality materials on the market, and always respecting the environment. This, honoring and promoting both the architectural works that have shaped the creative avant-garde trends since the mid-twentieth century which together provide a differential value to children and parents.
